HIGHLANDS WINTER DRIVE

**DON'T
JUST TAKE
OUR WORD
FOR IT**

“Thank you so much for conducting the recent Winter Driving Training. We have received some fantastic feedback, & employees have advised that this was the best winter driving course they have ever attended. We will most definitely be using you for our next year's training”

HOLLY MORIARTY,
QUEENSTOWN LAKES DISTRICT COUNCIL

“Our company staff do all the electrical work for three local ski fields, as well as driving throughout Central Otago, & as such they are faced with a wide range of driving conditions. We have found that by putting them through the Highlands winter driving course prior to winter, focuses their minds on the challenges they will face during winter. Our staff look forward to it – & you can't say that too often about training! It's fast paced & hand's on. I'm confident that their experience at Highlands has not only made them better drivers, it's given them skills they'll use for life.”

DAVE DUNLOP,
PEAK POWER SERVICES

WHY should we do this as a company?

Our staff have a driver's license, they know how to drive!

The Health & Safety at Work Act 2015, states that a vehicle is a place of work – & as such anyone that drives as part of their work must receive training that is specific to the job, otherwise the company could be liable (or partly liable) in the event of an accident.

We offer a three hour driving experience that is going to give your employees the PRACTICAL skills to keep themselves safe & in control on the roads, by demonstrating safe & efficient driving skills, in turn creating an environment in your workplace, that supports the highest level of professional conduct while driving.

Staff who are experienced in safe driving, are likely to have less accidents, which results in less downtime, less vehicle damage, which results in fewer insurance claims & perhaps a reduction in insurance premiums & excesses.

While this experience assists you with meeting your obligations under the act, most importantly it provides skills that can potentially save your employees lives & the lives of others.

How do we achieve this?

We provide tailored instruction for each participant, in a safe environment, that requires them to step out of their comfort zone, while at the same time upskilling them to become a better, safer driver.

They will learn under the tuition of our Chief Instructor

- How to stop in an emergency
- How to handle your car in adverse conditions (including ice simulation)
- Basic Car maintenance
- What to do if you lose control of your vehicle
- Safe driving techniques
- Economical driving techniques

All of the training is undertaken in the participants car - better equipping themselves to understand the potential of their safety systems in the car they drive on a daily basis. A morning or afternoon tea is provided on site, as well as the opportunity for participants to do controlled track laps on part of the Highlands circuit – always a highlight at the end of the experience.

We have a maximum of 30 participants & a group discount applies for groups of 10 or more.
