# WINTER DRIVE EXPERIENCE

**For individuals and groups**  
Session sizes are max of 10 participants.  
**Group discount** when booking 10 or more participants.

## Don't just take our word for it.

**Andy Wilkinson**  
Cromwell

"The course was absolutely fantastic and it did give me a much better understanding of the capabilities of my car and handling in winter."

**Holly Moriarty**  
Queenstown Lakes District Council

"Thank you so much for conducting the recent Winter Driving Training. We have received some fantastic feedback, & employees have advised that this was the best winter driving course they have ever attended. We will most definitely be using you for our next year's training."

**Detective Matt Jones**  
Queenstown Police  
(Area Health & Safety Representative)

"We know more than most the heart-breaking consequences of people not having the correct skills to drive to the conditions on NZ roads. Having put several of the team through the winter drive programme at Highlands, we are confident that this programme is playing a role - one person at a time, in upskilling drivers to be able to drive to the conditions and understand the basic principals of driving, in turn making our drivers safer. Our team enjoyed the day immensely as well - which is not often easy to do with training. They were impressed with the delivery of the training and the knowledge and expertise behind it. We'd highly support this programme."

## Safe Driving - It is in YOUR hands

The first time you take defensive action in a vehicle, should be in a safe and controlled environment, not on an open road with traffic - let us give you the practical skills to keep you and your loved ones safe this winter.

As we know, the South Island road conditions can change suddenly and unpredictably during the winter months. Slippery, frosty and icy surface conditions along with inexperienced drivers require safe and effective driving skills to ensure that drivers can get home safely.

We offer a three hour driving experience that will provide the practical skills that will help to keep drivers safe and in control on the roads year round. The experience we provide uses the participants own vehicles which means that they will be more attuned to knowing how to respond should the unexpected suddenly arise.

## How do we achieve this?

We provide a tailored practical instruction for each participant, in a safe environment using their own vehicle, that will enable them to step out of their comfort zone, while at the same time providing valuable skills through practical experience to become a better, safer driver.

## Learn under the tuition of our Chief Instructor

- ◆ How to stop in an emergency
- ◆ Safe driving techniques
- ◆ What to do if you lose control of your vehicle
- ◆ Economical driving techniques
- ◆ How to handle your car in adverse conditions (including ice simulation)
- ◆ How ABS (anti-lock braking systems) works
- ◆ Basic car maintenance
- ◆ How ESC (electronic stability control) works

The experience includes a class room session with morning tea provided in addition to the practical experiences on Highlands purpose built skid pan. The opportunity for participants to also undertake controlled track laps on part of the Highlands circuit is always a highlight at the end of the experience!
